Adobe Software

PROJECTS

NBA Statistic Visualizer

Description: An application that takes basketball statistics from an API and displays them in a chart visualization format using the Chart.js library.

Stack: Postgresql, Express, React, Node

- Developed dynamic components for the app and the filter function for the statistics
 - Worked across the development lifecycle to build and maintain the code at a high level
 - Rigorous testing using React frameworks such as Jest, Storybook, and Cypress to help eliminate over 50 bugs
- Project Code: <https://github.com/jasforshort/basketball-labs>

Buy & Sell Website

Description: A project that allows admins and users to buy and sell by searching and filtering for particular collectible cards.

Stack: Javascript, Express, Node, Postgresql

- Produced a dynamically refreshing conversations feature which updates through a database query to display the messages between the user and admin
- Implemented various tests to fix bugs using Chai & Mocha framework

Project Code: <https://github.com/jasforshort/mid-term>

Kinectivity

Description: A local startup based on connecting fitness enthusiasts through location, time, and activity.

Stack: Javascript, Express, Node, MongoDB

- Design, build, or maintain websites, using authoring or scripting languages content creation tools, management tools, and digital media
- Write, design, or edit web page content, or direct others to produce content
- Develop databases that support web applications and websites

EDUCATION

Lighthouse Labs

Diploma in Full Stack Web Development

McMaster University

Bachelors of Computer Science
